

## Woodworking Challenge

### Helping winter birds survive

Over the years we have made several different projects. Last year we made several napkin holders you saw when you worked the 4H Food Stand at the fair.

This year we are going to build a suet feeder for winter feeding of birds

#### Challenge:

To build this feeder you will need

- Be in 4<sup>th</sup> grade or above
- a 1 inch by 3 ½ inch wide board at least 24 inches long.
- a ¼ inch dowel at least 40 inches long.

Bring these supplies to the January Thaw and you should leave with a suet feeder to finish at home.

See back side for more information
